1590

15" Belt 90' length
Discharge Heights:
11.5m at 25° (nominal)
13.9m at 31° (max)

Self Propelled Scissor Lift Tube Conveyors

Portable belt conveyor with Yanmar diesel drive self-propelled kit.

The Self-Propelled Kit features a self-contained hydraulic self-propel package that allows control of all functions, including steering to easily maneuver and drive your conveyor across the ground. It also allows hydraulic running of the belt and raising and lowering to the appropriate filling height.

Nominal degrees are where the machine will perform best for rated capacity. While the machine can reach the maximum height there may be some reduction in capacity. Claimed tonnes per hour dependent on material type, environmental conditions, angles and moisture levels.

*Capacity depends on material, moisture, density and angle
